

Competitor Behavior Patterns

Intelligence report | April 20, 2026

Patterns no one else can see

These behavioral patterns were detected by monitoring competitors continuously over 8 to 14 months. They reveal recurring pricing strategies, promotional rhythms, and stock management habits. A competitor or in-house tool starting today would need the same amount of time to detect them.

MONTHLY VALUE

+QAR 45K

PATTERNS DETECTED

4

TIME TO REPLICATE

8-14 months

1. Carrefour

Both | Electronics | 14 months of data

94% confidence

DETECTED PATTERN

Drops electronics prices every 3rd Thursday of the month by 8 to 12%

Typical depth: 8-12%

EVIDENCE

- **Nov 16, 2025** Electronics category dropped 9.2% across 47 products
- **Dec 21, 2025** Electronics dropped 11.1% across 52 products
- **Jan 18, 2026** Electronics dropped 8.7% across 44 products
- **Feb 20, 2026** Electronics dropped 10.3% across 49 products

RECOMMENDATION FOR SNOONU

Hold your electronics promotions until the Friday after Carrefour's Thursday drop. Their traffic spike peaks Thursday evening and fades by Saturday. You capture the residual demand at a better margin. Do not try to compete during their drop window. Instead, position yourself as the option for shoppers who missed the deals or want faster delivery.

Estimated impact: **+QAR 14K monthly from better promotion timing**

2. Talabat

Online | Grocery | 11 months of data

89% confidence

DETECTED PATTERN

Runs flash grocery discounts every Sunday between 6pm and 9pm

Typical depth: 10-15%

EVIDENCE

- **Jan 5, 2026** Grocery flash sale 6:02pm to 8:58pm, avg discount 12.4%
- **Jan 12, 2026** Grocery flash sale 6:10pm to 9:05pm, avg discount 11.8%
- **Feb 2, 2026** Grocery flash sale 5:55pm to 9:00pm, avg discount 13.1%

- **Mar 9, 2026** Grocery flash sale 6:00pm to 8:50pm, avg discount 10.9%

RECOMMENDATION FOR SNOONU

Schedule your grocery push for Monday morning. Talabat's Sunday buyers have already purchased, but Monday has low competition and your delivery speed advantage peaks during working hours when people order for home delivery. Run a 'Monday Fresh' campaign specifically targeting items that Talabat discounted the night before.

Estimated impact: **+QAR 8K monthly from shifted grocery promotion timing**

3. Amazon.ae

91% confidence

Online | Electronics | 9 months of data

DETECTED PATTERN

Raises prices 5 to 8 days before a major sale, then discounts back to the original price

Typical depth: Perceived 20-30% discount, actual 3-5%

EVIDENCE

- **Nov 17, 2025** Avg electronics price raised 18% across 230 products
- **Nov 25, 2025** Black Friday sale launched with 'up to 25% off', net price 2.8% below pre-inflation
- **Mar 5, 2026** Avg electronics price raised 22% across 195 products
- **Mar 14, 2026** Spring sale launched with 'up to 30% off', net price 4.1% below pre-inflation

RECOMMENDATION FOR SNOONU

Do not react to Amazon's pre-sale price hikes. Your team may see their prices jump and think demand is shifting. It is artificial inflation. Hold your prices steady. When their sale launches, your regular prices are already competitive without any margin sacrifice. Communicate this to your category managers so they do not panic-adjust.

Estimated impact: **Prevents unnecessary margin erosion of 3-5% during Amazon sale periods**

4. Lulu

87% confidence

In-Store | Electronics, Home | 8 months of data

DETECTED PATTERN

Stocks out on premium electronics and home appliances 2 to 3 days before weekend

EVIDENCE

- **Dec 18, 2025** Dyson, Samsung premium range out of stock at Lusail location by Wednesday
- **Jan 15, 2026** Apple accessories, Dyson out of stock at Al Gharafa by Thursday morning
- **Feb 12, 2026** Premium electronics stock gaps at 3 of 4 monitored Lulu locations by Wednesday
- **Mar 19, 2026** Similar pattern, stock gaps appearing Wednesday afternoon

RECOMMENDATION FOR SNOONU

Push premium electronics and home appliance ads on Thursday evening, specifically targeting areas near Lulu locations (Lusail, Al Gharafa, Al Messila). Their stock gaps are your conversion opportunity. Customers who visited Lulu and found items out of stock will search online. Be the first result they see with guaranteed same-day delivery.

Estimated impact: **+QAR 11K monthly from capturing Lulu stock gap demand**
